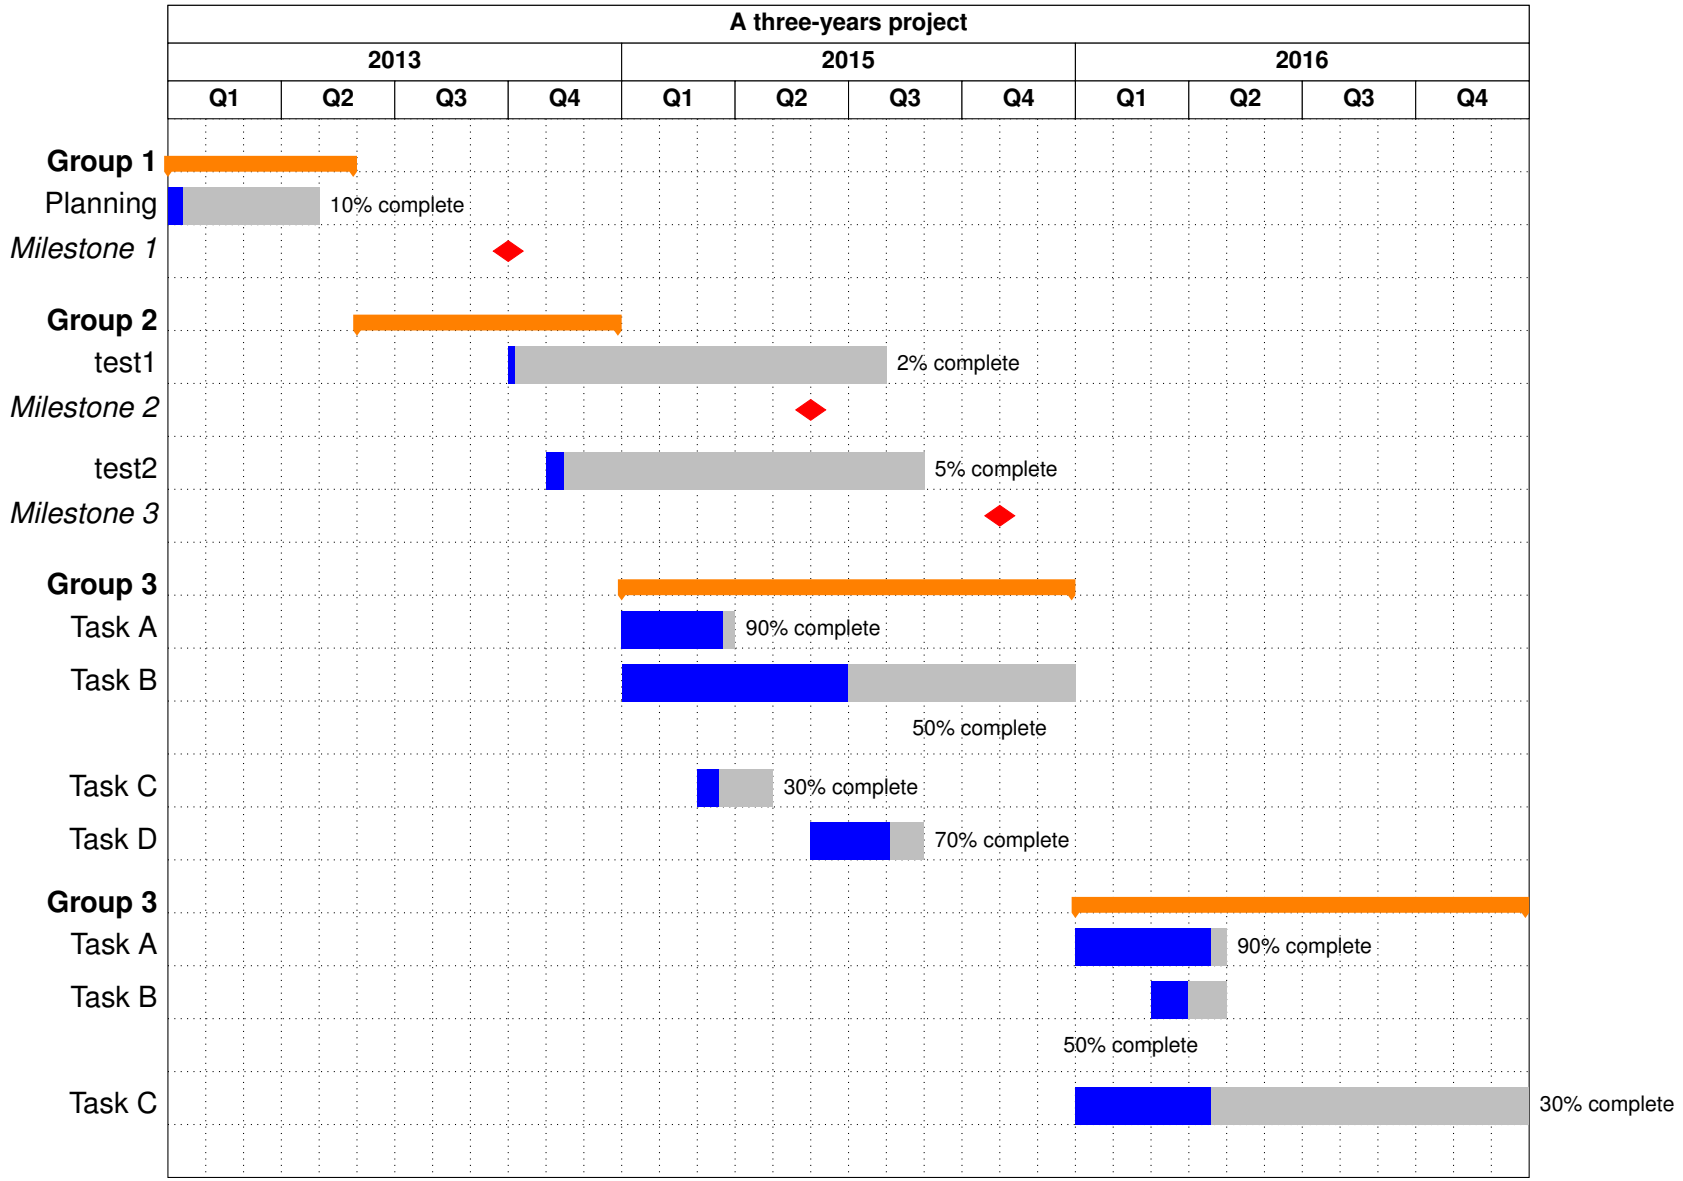
Gustavo Banegas

1 Résumé du Scientifique

1. **Le résumé du scientifique** (3 pages max.) mettant en avant les rubriques suivantes, en lien avec les critères d'évaluation :

    - **Présentation** : positionnement, enjeux, objectifs, méthodes, liens avec la stratégie de l'École.
    - **Impacts, retombées et ambitions** : publications, colloques, collaborations, contrat industriel, obtention de financement (ERC, ANR, . . .).

2 Calendrier



3 CV

1. The scientific summary (maximum 3 pages) highlighting the following sections, in connection with the evaluation criteria:
    - **Presentation:** positioning, challenges, objectives, methods, links with the School's strategy.
    - **Impacts, outcomes, and ambitions:** publications, conferences, collaborations, industrial contracts, funding acquisition (ERC, ANR, ...).
2. The timeline detailing the work plan over 3 years (maximum 1 page).
3. The projected budget over 3 years (maximum 1 page). This budget must be realistic, and the Foundation reserves the right to suspend or even terminate the project's funding, particularly in the event of an unjustified failure to comply with the budget.
4. The candidate's CV (maximum 3 pages).

Work Experience

- **Researcher**, INRIA, Palaiseau, France (Oct/2024 – Current)
    - Conduct cryptography research in the following areas, among others:
        * Secure implementation of post-quantum cryptography.
        * Design and development of specialized hardware for post-quantum cryptography.
        * Creation of countermeasures to mitigate side-channel vulnerabilities.
- **Senior Cryptographer**, QUALCOMM, Sophia Antipolis, France (Jul/2022 – Sept/2024)
    - Development of post-quantum cryptography on Snapdragon processors, including but not limited to:
        * Design and develop specific hardware for post-quantum cryptography.
        * Development of new attacks on post-quantum cryptography (side-channel attacks).
        * Development of countermeasures against side-channel attacks.
        * Speed-up implementations on Cortex-M3 and M4.
        * Development of post-quantum cryptography for RISC-V.

- **Post-doc**, INRIA AND ÉCOLE POLYTECHNIQUE, Paris, France (Dec/2020 – Jul/2022)
  - Development of post-quantum cryptography in embedded devices:
    * Development of new attacks on post-quantum cryptography (side-channel attacks).
    * Development of countermeasures against side-channel attacks.
    * Speed-up implementations of cryptographic signatures for RIOT-OS.
- **Post-doc**, CHALMERS UNIVERSITY OF TECHNOLOGY, Gothenburg, Sweden (Nov/2019 – Nov/2020)
  - Development of the WASP Project:
    * Development of new attacks on post-quantum cryptography.
    * Development of post-quantum cryptography.
    * Development of verifiable functions.
- **Research Assistant**, CHALMERS UNIVERSITY OF TECHNOLOGY, Gothenburg, Sweden (Sep/2019 – Nov/2019)
  - Development of the WASP Project:
    * Development of new attacks on post-quantum cryptography.
    * Development of post-quantum cryptography.
    * Development of verifiable functions.
- **Intern**, CRYPTOEXPERTS, Paris, France (Sep/2018 – Nov/2018)
  - Side-channel attacks on post-quantum cryptography implementations.
    * Detected leakage of timing in operations to develop timing attacks.
- **Intern**, RISCURE, Delft, Netherlands (Feb/2017 – Apr/2017)
  - Side-channel attacks on ECC implementations.
    * Investigated attacks on implementations of ECC in FPGAs using power analysis.
- **System Analyst**, BRY TECNOLOGIA, Florianópolis, Brazil (Oct/2014 – Sep/2015)
  - Software development for Public Key Infrastructure (PKI).

        * Developed software in Java and C++.
        * Integrated HSM in Java applications.
        * Managed a team using Scrum.

- **Researcher, Project Manager, and Developer**, LABSEC - LABORATORY FOR COMPUTER SECURITY, Florianópolis, Brazil (Nov/2009 – Oct/2014)
    - Researcher in cryptography, project manager, and developer of security software using *Java*, *C/C++*, and *Python*.
        * Researched cryptography applied to PKI.
        * Managed the project reference for the Brazilian PKI.
        * Managed the project defining attribute certification in Brazil.
        * Developed software in C/C++, Java, and Python.

Program Committee Member

- CBCrypto: 2020, 2021
- CHES: 2022, 2023, 2024
- Eurocrypt: 2022
- LatinCrypt: 2023
- Asiacrypt: 2023
- ACNS: 2024

External Reviewer

- CRYPTO: 2022
- Asiacrypt: 2018, 2019, 2020, 2021
- FSE: 2021
- LatinCrypt: 2021
- SPACE: 2020
- PQCrypto: 2018
